

The project proposes installing sidewalks and an enhanced crosswalk at the bridge to provide pedestrian access and reduce the bridge width to calm traffic speeds.

View of the crosswalk location, where rectangular rapid flashing beacons will warn of pedestrians.

Sidewalks on the south side of VT-30 to access both School St and the Mach's Market parking area.

Sidewalks will be installed along VT-133 to the Pawlet Community Church parking lot.

Sidewalks will extend to the Post Office and a crosswalk will be installed across Cemetery Hill.
